Office, Residence

Fiber Luminaires, with their elegant designs, can be utilized for various lighting needs within offices. Lighting systems can be arranged to enhance work efficiency and ensure the comfort of employees. Additionally, fiber products offer advantages such as energy efficiency and long lifespan, thereby reducing business costs. This technology not only creates a modern look and impressive atmosphere in offices but also increases productivity by meeting the needs of employees

Istanbul Financial District

Country : Turkiye
City : Istanbul
Year : 2023
Project Category : Office
Product Category : Facade

The Istanbul Finance Center project, one of Turkey's strategic initiatives, is built on an area of two and a half million square meters, featuring office towers, convention centers, shopping malls, and residential spaces. The structure is a mega-project combining traditional and modern architecture.

Nearly all of the GYO buildings within the project, certified with Gold LEED and designed with a smart city concept, bear the Fiberli signature. The impressive designs from leading lighting design offices in Europe and Turkey come to life with meticulously planned Fiberli facade luminaires. We take pride in contributing to the skyline of this ancient city by hosting significant banks and financial institutions from both domestic and international arenas.

Bank of Baghdad

Country : Iraq

HOSPITALITY

Fiberli offers a pioneering solution for facade, pool, and interior lighting in hotels and accommodation facilities. When used on facades, Fiberli products accentuate the design of buildings and highlight architectural details, providing guests with a unique experience. In pools, they enliven the surface of the water with colorful and dynamic effects, creating a relaxing atmosphere for guests. Indoors, fiber optic lighting provides an aesthetic and modern appearance across a wide range of spaces, from hotel lobbies to room interiors. The flexibility and energy efficiency of this technology offer significant advantages both visually and functionally when used in the hospitality sector.

HISTORICAL AND CULTURAL STRUCTURES

Emphasizing the importance of historical and cultural structures and enhancing significant works is one of Fiberli's areas of expertise. Its technology is used to emphasize the architectural details and characteristics of historical buildings while enhancing the atmosphere to provide visitors with an unforgettable experience. Additionally, by offering advantages such as energy efficiency and longevity, Fiberli reduces maintenance costs. With these features, Fiberli emphasizes the significance of historical and cultural structures and contributes to tourism by attracting more visitors.

First built by Byzantine Emperor Justinian in AD 507-508, the Galata Tower is the first structure that comes to mind when thinking of Istanbul's symbols. The tower, which was used for many years as a watchtower to protect the city from external threats, now serves as a museum, shining brightly at night.

Galata Tower

Country	: Turkiye
City	: Istanbul
Year	: 2024

Ayasofya – Hagia Sophia

Country	: Turkiye
City	: İstanbul
Year	: 2023
Project Category	: Historical and Cultural
Product Category	: Facade
Used Product	: WLT, WL

Hagia Sophia, with its breathtaking domes seemingly suspended in the air, monolithic marble columns, and unique mosaics, is one of the wonders of world architectural history. Fiberli's signature is present in the simple yet striking lighting of Hagia Sophia, the unparalleled witness of history.

Sultan Ahmet Mosque – Blue Mosque

Country	: Turkiye
City	: İstanbul
Year	: 2023
Project Category	: Historical and Cultural
Product Category	: Facade
Used Product	: WLT

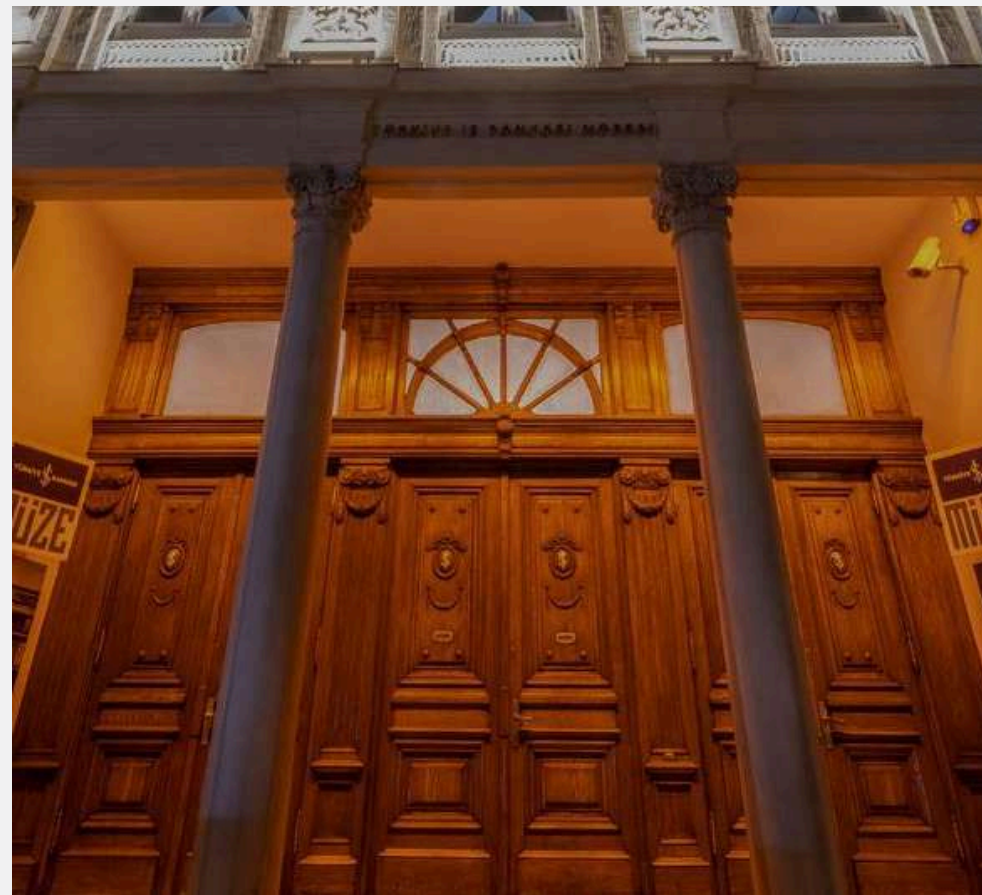

There's certainly a reason why it's called the Blue Mosque. Perhaps the 21,043 tiles inside the Sultan Ahmed Mosque, creating a bluish effect, of a quality that may never be achieved again, contribute to that name. The Sultan Ahmed Mosque, where classical Ottoman architecture is meticulously crafted in every detail, exudes magnificence in every texture. While the lighting reveals the entire structure, it also carries the signature of Fiberli, not overshadowing its grandeur. With the lighting technique employed, fixtures positioned from the ground up collide with unique textures, ascending towards the sky and disappearing.

ENTERTAINMENT

In the entertainment sector, Fiberli lighting is an excellent choice for transforming the atmosphere of venues and providing unforgettable experiences. Fiberli luminaires can be used across a wide range of venues, from nightclubs to concert halls, theme parks to cinemas. With colorful and attention-grabbing effects, this technology revitalizes spaces and offers visitors a unique visual spectacle. Additionally, Fiberli lighting systems are programmable and can be controlled remotely, allowing venue owners and organizers to easily create the desired atmosphere. Along with these features, Fiberli enhances customer satisfaction in the entertainment sector and boosts the appeal of venues.

INDUSTRIAL

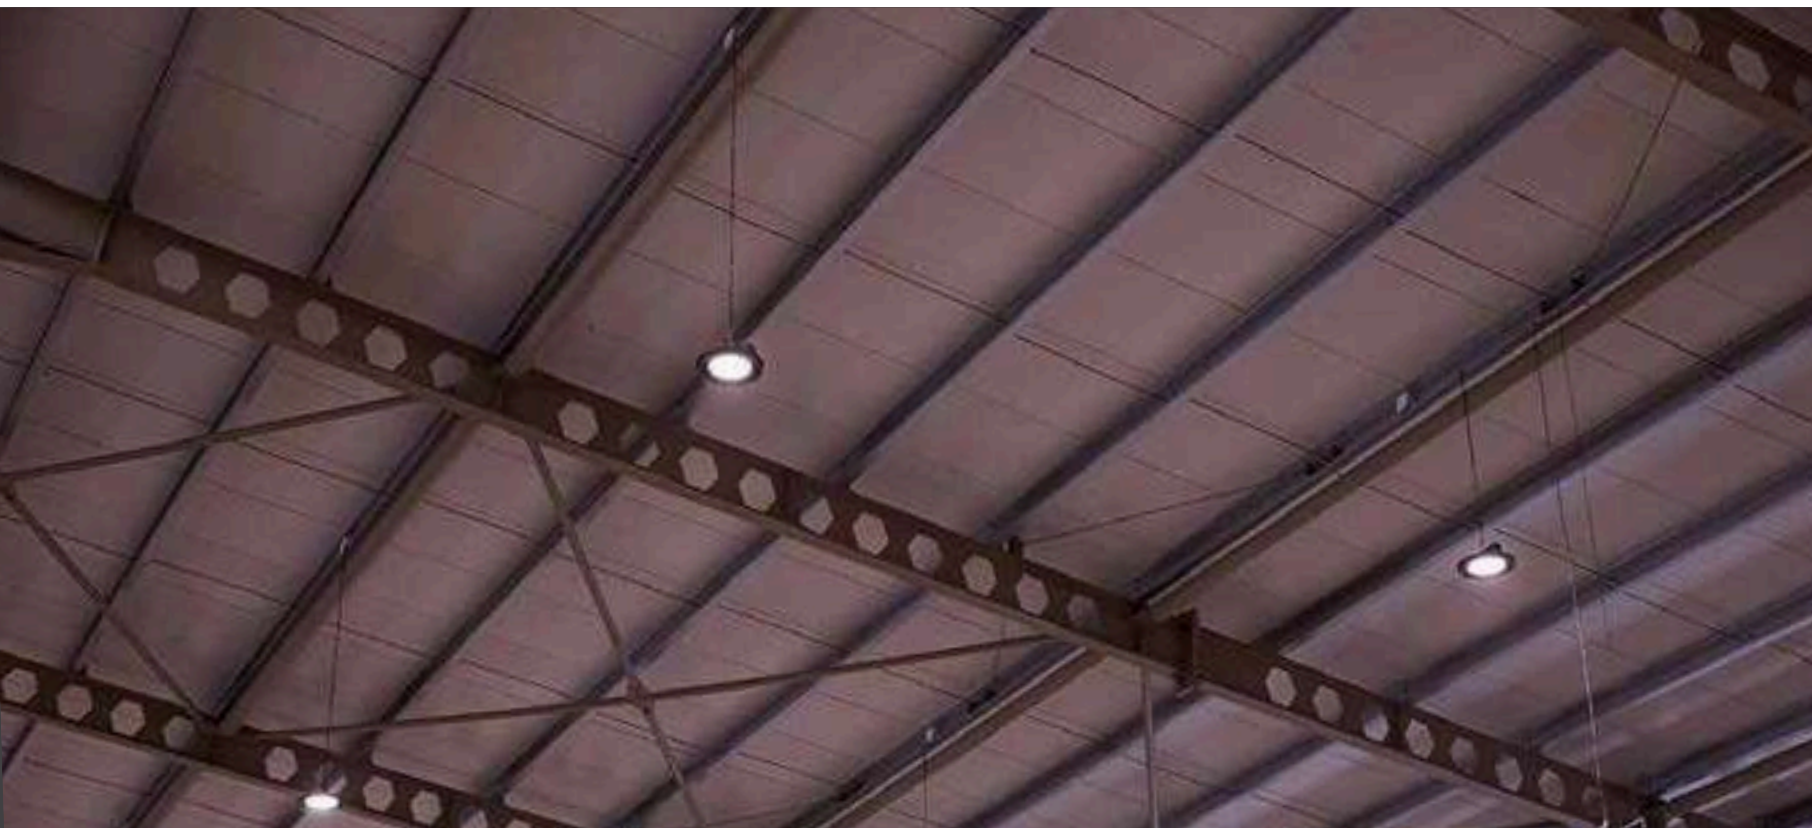

Correct lighting is an effective solution for providing a safe and efficient working environment in industrial facilities. With Fiberli products, industrial facilities can illuminate large areas brightly while ensuring energy efficiency. This technology is durable and long-lasting, reducing maintenance costs. Additionally, with color options and adjustable light features, specific areas within the facility can be highlighted or eye-catching visual effects can be created. Fiberli enhances both the safety of workers and equipment in industrial facilities while also offering a solution to increase productivity and efficiency.

SHOPPING

Fiberli offers modern and attractive product options for shopping malls and retail centers. With its advanced technology, it enhances the shopping experience visually and improves the atmosphere. Fiberli luminaires illuminate stores and common areas with colorful and attention-grabbing effects, helping to highlight brands and products. Additionally, they provide advantages such as energy efficiency and long lifespan, reducing maintenance costs. These features ensure that shopping areas are illuminated impressively while enhancing customers' shopping experience and increasing the attractiveness of your store.

PARK AND LANDSCAPE

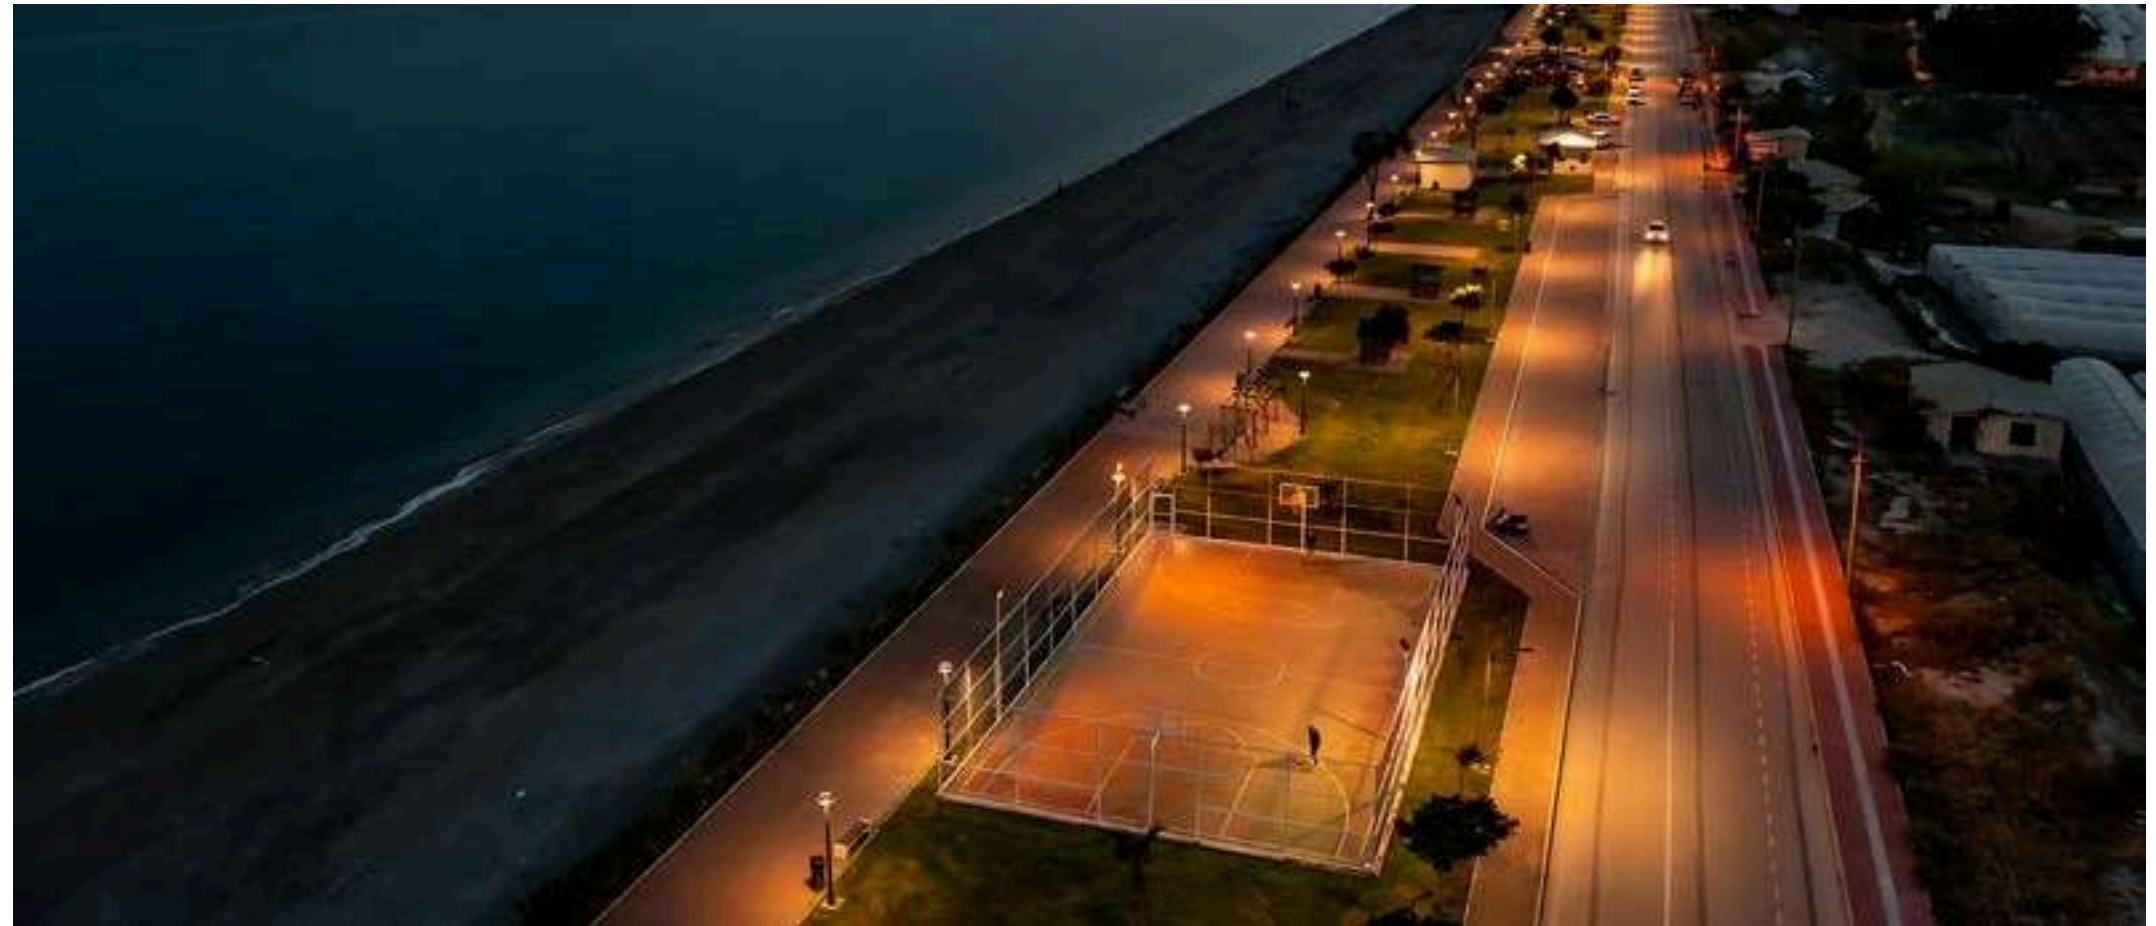

Fiberli lighting provides a striking solution in terms of design and functionality for landscape and park areas. Its technology offers an environmentally friendly lighting option, promoting energy efficiency. Fiberli products enhance parks with visual richness through their design, aesthetics, and light quality. Additionally, they have a longer lifespan compared to traditional lighting systems and lower maintenance costs. These features ensure that landscapes and parks are attractively illuminated day and night, thereby enhancing user safety and providing an enjoyable experience.
