STORY BEHIND THE PRODUCT

The WS Series was specifically designed to deliver maximum performance in modern architectural structures and narrow spaces. NanoFit Design technology was developed to combine aesthetics and functionality in lighting, enhancing projects with visual richness and overcoming spatial limitations. Thanks to its compact structure, it offers superior cooling capacity even in challenging outdoor conditions, providing a long-lasting and reliable lighting solution.

WHY WS

Aesthetic and Functional

Its minimalist design delivers high performance even in tight spaces, offering an aesthetic appearance.

Long-Lasting Performance

Manufactured to high-quality standards, it provides durable and reliable performance in outdoor conditions.

Eco-Friendly

With energy efficiency and low energy consumption, it is ideal for environmentally conscious projects.

Other features
